

Figure 36. Plots showing distribution of parameters of chert- (●) and quartzarenite (●) pebble subsets from each of measured sample sites of Pennsylvanian and Permian Strathearn Formation on "Mean B/A versus Median A" diagram, Beaver Peak quadrangle, Nev.

A, Lower conglomerate plot, site numbers correspond to figure 4 and 32, and to table 4; large framed arrows express probable washdown direction.

B, Upper conglomerate plot, site numbers correspond to figure 4 and to table 5. Dots of associated chert and quartzarenite subsets are linked by thin lines.
